SUMMARY

Software Developer with 4.5+ years of experience shipping production web apps in React.js and Angular with JavaScript and TypeScript. I've built consumer products where SEO and page speed drive revenue, and enterprise dashboards where clean state management and test coverage matter most. I own features from design review to production, and I pick up a new framework quickly because I focus on the fundamentals underneath it.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Node.js
React & Next.js: React.js (v16-19), React Hooks, Redux Toolkit, React Query, React Server Components, Server Actions
Angular: Angular (v14-19), RxJS, NgRx, Angular Signals, Standalone Components, Reactive Forms, Angular Material
Styling & UI: Tailwind CSS, Angular Material, Design Systems, Responsive Design
Build & Version Control: Vite, Webpack, Git, GitHub, Azure, GCP, CICD
Concepts: REST APIs, Micro-frontends, Web Accessibility, SEO, Performance Optimization

WORK EXPERIENCE

Software Developer | WebMD India **January 2026 – Present**

- Created a custom SSE stream handler with a CDN configurable render pace, letting product tune answer display speed without redeploys
- Cut initial UI build time by 50% by using Claude Code with the Figma MCP to generate frontend components directly from design files
- Migrated 70% of high-traffic legacy modules from vanilla JavaScript to a reusable Page Builder architecture, reducing technical debt

Software Developer | Jio Platforms Limited **July 2022 – January 2026**

- Built a web-based ad customization tool for internal stakeholders, streamlining the creative process and reducing ad production time by over 50%
- Implemented real-time interactive features such as play along contests, live feeds, anchor chats, and polls for high-traffic digital events, resulting in a 25% increase in user retention during broadcasts
- Created modular, reusable components and widgets, enabling seamless integration across multiple mini-apps and improving development speed and consistency
- Optimized frontend performance by implementing lazy loading, compressing assets, and analyzing bundle sizes using Webpack, reducing load times and improving app responsiveness by 30–35%

PROJECTS

Audiovox Headphone Storefront (Next.js 16, App Router, React, MongoDB, NextAuth.js, Tailwind CSS) GitHub

- Built a responsive headphone storefront with server-rendered product pages with dynamic routes and product specific metadata
- Implemented a browser-persistent cart and demo checkout that validates cart items and recalculates prices from MongoDB before saving orders
  Added a protected admin dashboard with credential-based authentication and validated Server Actions for product management

Elegant E-Commerce Furniture Store (React, Redux, Swiper.js) GitHub | Live Demo

- Built a fully responsive e-commerce website to enhance the online furniture shopping experience, improving user engagement and retention
- Used Redux and lazy loading to streamline state handling and optimize performance, cutting load time by 30% and improving page responsiveness and layout stability across devices
- Developed product carousel, filtering, grid view, wish list, and cart management to enable seamless navigation and better product discovery, increasing session duration

Forkify Recipe Management App (React, React Context, React Forms) GitHub | Live Demo

- Built a recipe search and management app to help users discover and organize recipes, improving accessibility and user experience
- Implemented search, pagination, and bookmarking to enhance recipe discovery and user engagement, ensuring seamless navigation and persistence via local storage
- Added a dynamic recipe creation form and loading indicators to streamline user interactions, leading to a smoother and more responsive experience

EDUCATION

University of Mumbai | Mumbai **August 2018 – May 2022**
B.E. in Information Technology
